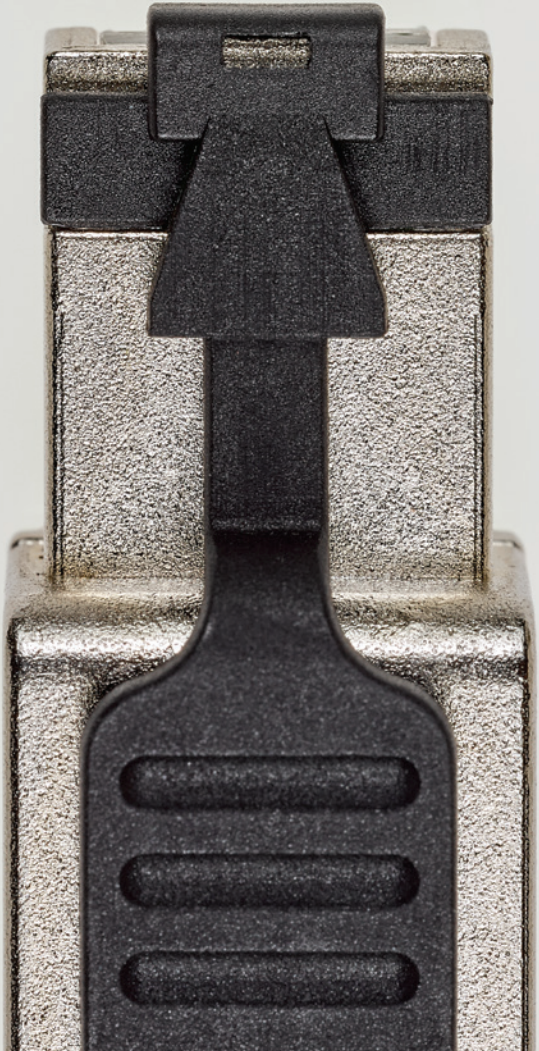
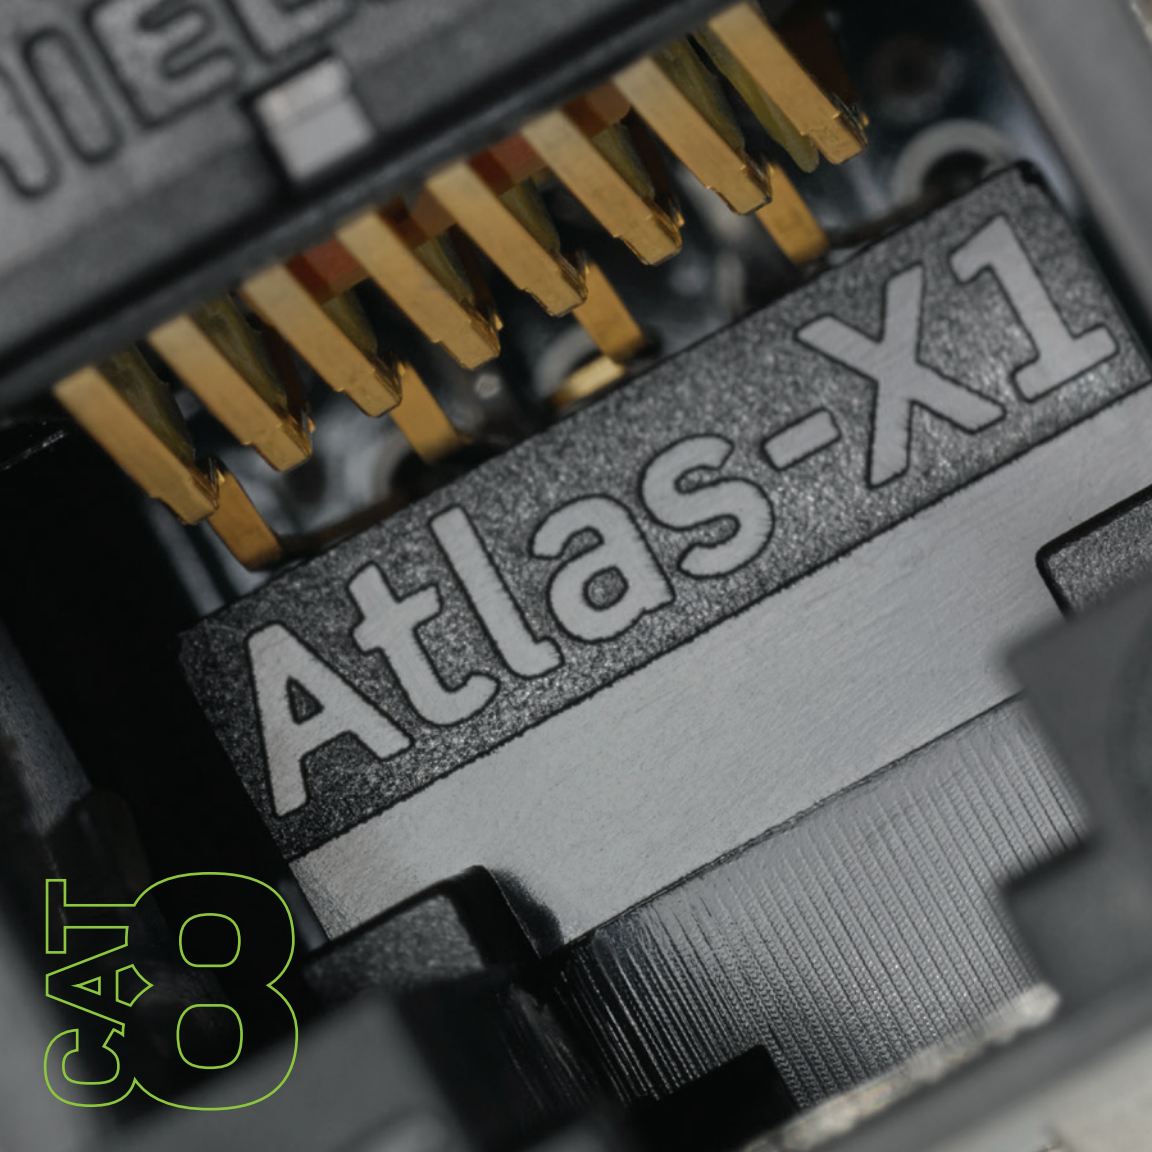
LEVITON

Unveiling the Future

Today's data centers must be forward-looking, ready to handle unprecedented data growth in **a rapidly evolving world**.



CAT 8



Atlas-X1
CAT 8

The new Atlas-X1™ Category 8 System is built for advanced data center networks, creating a **flexible and scalable** copper infrastructure that will grow as your business grows.

When designing Atlas-X1, Leviton engineers **considered every detail**, crafting a finely-tuned system that's easy to install.

Using trusted RJ-45 connectivity, the Cat 8 system has the same connector form factor as Atlas-X1 Cat 5e, 6, and 6A — allowing for a **seamless migration to 25G and 40G networks**.

System components have undergone rigorous testing by independent labs and Leviton quality engineers, ensuring **real-world readiness** for the most demanding network conditions.
